

RVS-AX and SOLSTART PLUS

**Electronic Soft Starters 8-170A, 220-600V
with built-in bypass**

RVS-AX

Electronic Soft Starter 8-170A, 220-600V
with a built-in bypass

Incorporating Current Limit and Motor Protection, with simple installation and easy operation, the RVS-AX is an optimal solution, including a built-in bypass for small to medium size motors, in standard duty applications.

Advantages at a glance

- Soft start & Soft stop
- Current Limit
- Line and Inside delta connection
- Built-in motor Protection
- Built-in bypass (31-170A only)
- Compact, small foot print
- Aluminum case

Motor & starter protection

- Electronic overload
- Phase loss
- Starter over-temperature
- SCR protection by Metal Oxide Varistors

Displays (LEDs)

- On
- Ramp Up / Down
- Run
- Overload
- Phase Loss
- Over Temperature

Auxiliary relays

- End of Acceleration Relay
- Fault Relay

Applications

- Pumps
- Compressors
- Fans & Blowers
- Conveyors & Monorail systems
- Starting from weak power supplies (diesel generators, long supply lines, etc.)

SOLSTART PLUS

Soft Starter 31-170A, 220-600V
with a built-in bypass

Uniquely designed for OEM's

Compact, includes current limit and basic motor protection features. Designed for use with motors in commercial applications. The SOLSTART PLUS provides both soft start and soft stop and incorporates two phase control with a built-in bypass.

Advantages at a glance

- Two phase control
- Soft start & Soft stop
- Current Limit
- Built-in motor protection
- Built-in bypass
- End of Acceleration Relay
- Fault Relay (58-170A)
- Compact, small foot print
- Aluminum case
- DIN Rail mounting (option for 31-44A)
- Cost effective

Motor & starter protection

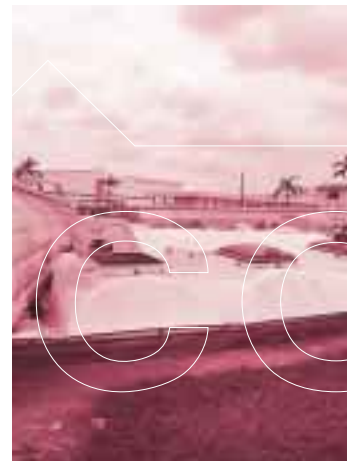

- Electronic overload
- Phase loss
- Starter over-temperature
- SCR protection by Metal Oxide Varistors

Displays (LEDs)

- On
- Ramp Up / Down
- Run
- Overload
- Fault

Applications

- Pumps, Fans, Compressors
- Conveyors & Monorail systems
- Machine tools
